BT Mode:

- The headphone enters BT mode as soon as it is powered ON. (Refer LED indication and make sure aux is not connected already)
- Now search for nearby BT devices in your audio source device.
- Tap on the BT name **"ZEB-DUKE PRO"** to pair.

Dual Pairing Mode:

- Pair the headphone with one device and do

not unpair, now turn off the BT on the first device and pair the headphone with the second device.

• Now you can turn on the first device and the headphone will automatically pair with the first device (if your device is compatible) else tap on **ZEB-DUKE PRO** in the BT settings on your first device.

AUX Mode:

• Connect one end of the 3.5mm aux cable to the headphone and connect the other end to any compatible audio source device. (Example: Mobile, Tablet, Laptop, Desktop Computer, etc)

• Media controls can be done via the audio source device. (Make sure to power on the headphone to use BT mode after removing the aux cable)

Gaming Mode (Low Latency):

• Double press the MFB button to enable gaming mode and repeat the process to enter into music mode.

Voice Assistant Support:

• When the headphone is connected with a smart phone, Triple press MFB button to activate the phone's voice assistant function.

LED Indication:

- Charging – Constant Red LED glows
- Full Charge – Red LED goes OFF
- BT Discover Mode – Blue and Red LED blinks rapidly
- BT Connected – Constant Blue LED, then LED goes off
- ANC – White LED glows when activated and goes off when disabled.
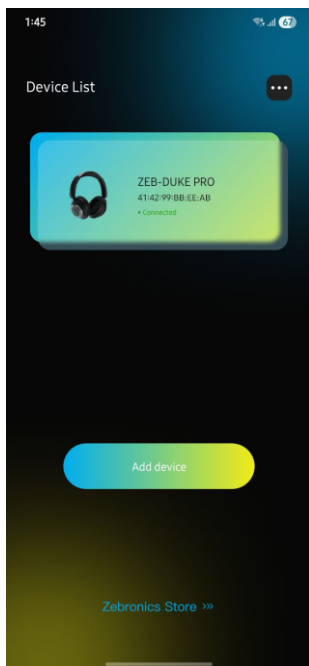

Application Function

For full access to the Headphone exquisite features and an optimal experience, we recommend downloading its exclusive supporting APP : **ZEB-AURAL IQ**

Scan the QR Code to download and install the APP and follow the on-screen instructions to connect the speaker to the APP. You can easily control all Speaker functions and enjoy a smarter experience.
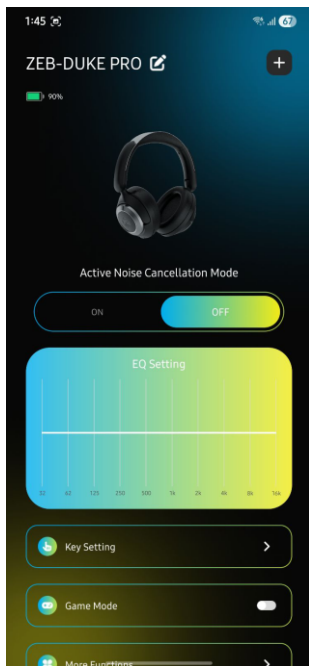

Connecting the Headphone

Once the BT is turned on, the Headphone is automatically detected by the **ZEB-AURAL IQ** App and it gets connected to the smartphone.

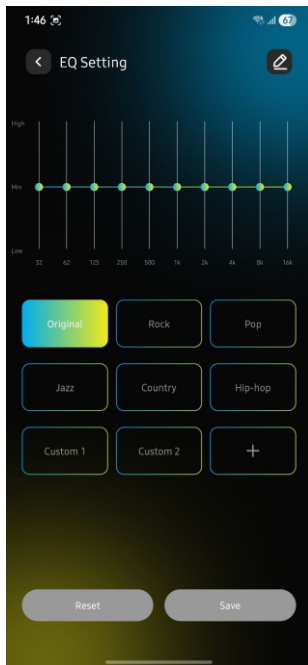

Application Control

When the Headphone is connected to the app, its ANC Modes, EQ Adjustment, Key Settings & More can be controlled.
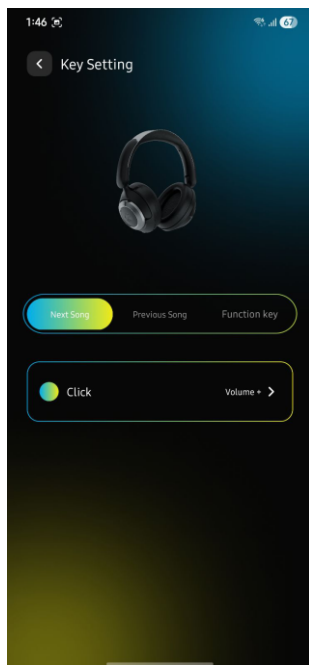

Equalizer Settings

The Headphone's EQ settings allow the users to adjust the audio output to their preference, offering different sound signatures for bass, treble, and overall tone.

The Headphone's comes with preset EQ modes and also allows the users to create their own custom EQ.
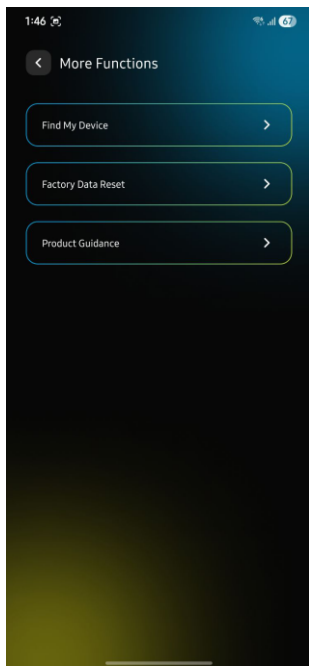

Key Setting

This feature provides the ability to modify and personalise the behaviour of individual keys according to your specific preferences. Users can fine-tune key actions, assign alternative functions, and optimize the keyboard layout for enhanced usability.

More Functions

This section offers additional tools for managing your device. Find My Device allows you to view the device's last known location, and when the headphones are connected, you can trigger a ping sound to help identify them easily. The Factory Data Reset option restores all settings including EQ profiles and button configurations to their original factory defaults, ensuring the product returns to its standard operating state.
