- ANC – White LED glows when activated and goes off when disabled.

## Application Function:

For full access to the headphone exquisite features and an optimal experience, we recommend downloading its exclusive supporting APP: **ZEB-AURAL IQ.**

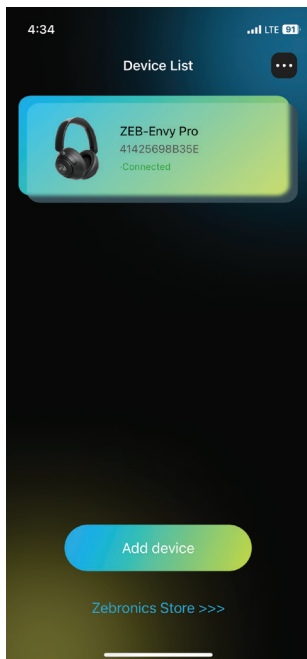

Available on iOS and Android.  
Download from the  
App Store or Google Play.

Scan the QR Code to download and install the APP and follow the on-screen instructions to connect the speaker to the APP. You can easily control all speaker functions and enjoy a smarter experience.

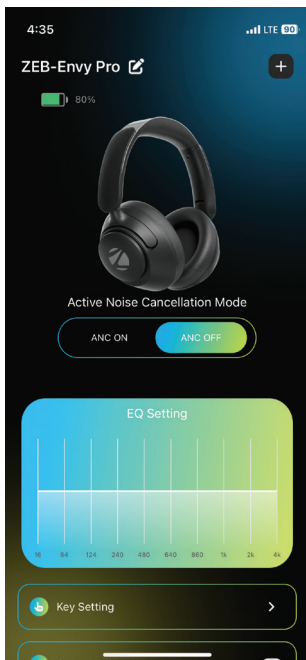

## Connecting the Headphone:

Once the BT is turned on, the Headphone is automatically detected by the **ZEB-AURAL IQ** App and it gets connected to the smartphone.

## Application Control:

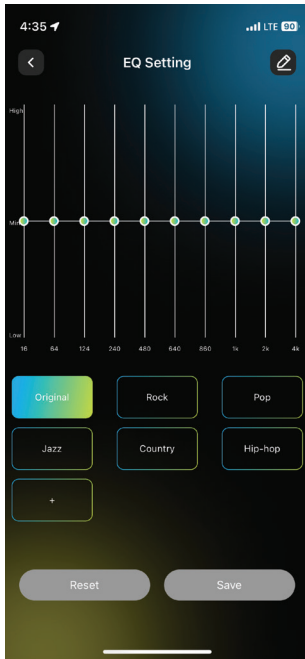

When the Headphone is connected to the app, its ANC Modes, EQ Adjustment, Key Settings & more can be controlled.

## Equalizer Settings:

The headphone's EQ settings allow users to adjust the audio output to their preference, offering different sound signatures for bass, treble, and overall tone.

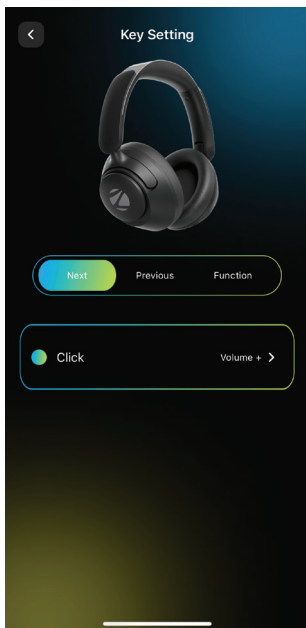

The headphone comes with preset EQ modes and also allows users to create their own custom EQ.

## Key Settings:

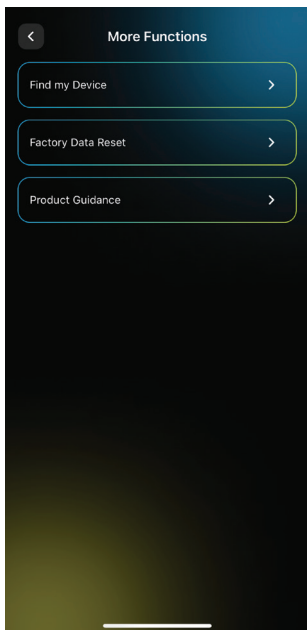

This feature provides the ability to modify and personalize the behaviour of individual keys according to your specific preferences.

Users can fine-tune key actions, assign alternative functions, and optimize the keyboard layout for enhanced usability.

### **More Functions:**

This section offers additional tools for managing your device. Find My Device allows you to view the device's last known location, and when the headphones are connected, you can trigger a ping sound to help identify them easily. The Factory Data Reset option restores all settings, including EQ profiles and button configurations, to their original factory defaults, ensuring the product returns to its standard operating state.
